

Share|Net: Accelerate Your SharePoint Intranet

In today's real-time business environment, a fully-functioning, comprehensive company intranet can make all the difference between empowered employees who can instantly collaborate with one another and a group of siloed departments that struggle to share critical data.

While an intranet can be an extremely effective business productivity tool, many organizations find themselves struggling to:

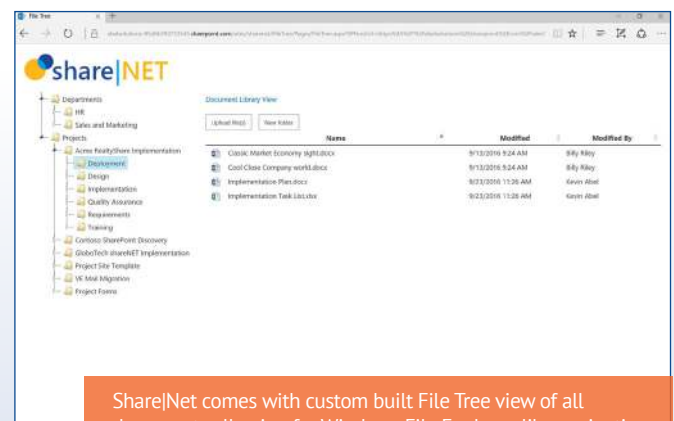

- Find the resources to build out the corporate intranet solution they know they need.
- Determine what should be included in their project plan for maximum value to internal customers.
- Deliver the project on a timeline when users need it.

Solving these challenges is where Abel Solutions can help. Share|Net, our proven SharePoint intranet framework, enables a rapid and cost effective implementation of a business intranet. Abel Solutions eliminates lengthy implementation time, unexpected costs and risks that often derail intranet development projects.

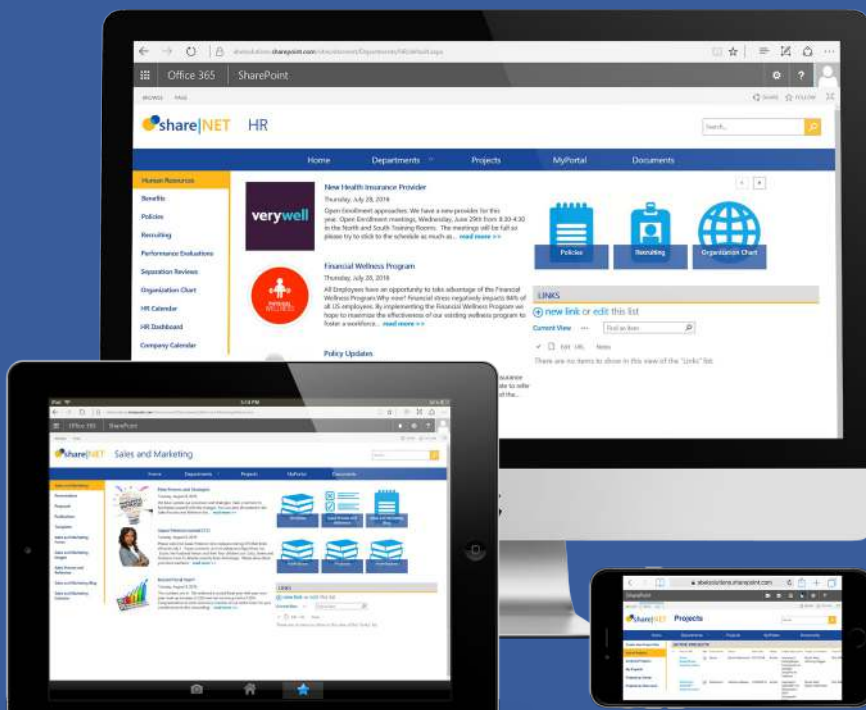

Abel Solutions portal experts use a best practices approach to customize the feature-rich Share|Net foundation to fit your unique business needs. This approach, using an out-of-the-box intranet foundation rather than starting from scratch, gets you implemented faster. Where a totally customized solution could take many months to create, a fully customized Share|Net portal can be delivered in less than one month.

Share|Net homepage can include corporate announcements, information highlights and key resources links.

Share|Net comes with custom built File Tree view of all documents allowing for Windows File Explorer-like navigation of your document hierarchy.

Mobile friendly design allows you to access Share|Net while on the go.

A COMPLETE AND CUSTOMIZABLE SOLUTION

Based on our significant experience building and maintaining SharePoint portals, we know many of the items intranets should offer to maximize user satisfaction and their success. This is why Share|Net comes pre-configured with the following components, capabilities and features:

- **Primary navigation schema:** Based on industry best practices and designed to offer users quick access to the information they need.
- **Home page layout:** Designed to be engaging and simple to navigate, with the ability to easily make changes to accommodate new information.
- **Departmental pages for HR, marketing, IT and finance/accounting:** Offers the best of "out-of-the-box" functionality without compromising the ability to customize your intranet to your organization; also enables you to add extra departmental sites.
- **Vacation (or paid time off) request workflow:** Complete tracking and approval of paid time off management.
- **Benefits information management:** Enables compliant, consistent benefit information flow to employees.
- **Recruiting tracking:** Allows you to manage the information workflow surrounding critical staff additions.
- **Automated provisioning of team and project collaboration sites.**
- **File tree application:** Offers users a familiar, easy to navigate interface similar to Windows Explorer for documents.
- **Pre-configured search with search refiners.**
- **MyPortal page:** Allows for ultimate personalization enabling ready access to tasks, requests, projects, etc.

FLEXIBLE PRICING AND IMPLEMENTATION METHODOLOGY

Experience shows that no two companies have an identical set of needs or desires.

Our standard pricing model includes the Share|Net framework cost, including time to brand and configure the solution to make it unique to your organization's needs. Additional customizations can be made in future phases, as desired or needed.

Share|Net is available for both SharePoint on-premises and in the cloud with Office 365/SharePoint Online.

Every day your employees struggle with outdated tools and limited access to key business data costs you revenue that is hard to replace. Give us a call and we'll show you how you can put the power of a true collaborative platform to work for your organization.

About Abel Solutions

For over two decades, clients have trusted us to help them reduce the cost, risk and implementation time associated with solving their most critical business IT and collaboration challenges. Abel Solutions can help you achieve powerful business improvement from document management and workflow-enabled SharePoint solutions, unique applications, technology planning and support, and a wide range of complementary IT services.

Our growing list of industry-specific solutions offer pre-built collaboration frameworks that shrink implementation time and cost. And as a long-standing Microsoft Gold Partner focused on improving business productivity, Abel Solutions now also offers services that help you achieve better IT cost control.
