

Abel Solutions Nintex Training: “Knocking It Out of the Park” for Users

Nintex, a leading process automation solution, is relied upon by companies worldwide to cost-effectively deliver workflow-enabled business solutions. Yet, due to its power and extensive capabilities, users can be challenged to leverage it to build workflows and forms. In response to this need, Abel Solutions (a Nintex partner since 2008 and a current Nintex Premier Partner) developed a Nintex training program that has become immensely popular with users in a broad spectrum of business categories.

Each course is conducted by Nintex Virtual Technical Evangelist (VTE) Nicole (Prestby) Vesser, a seasoned Nintex veteran with decades of experience who is treasured by both her students and the Nintex community.

“I was so impressed with Nicole — she really knocked it out of the park,” says Paige Beckum, a contractor for a leading business consulting firm (and Abel Solutions client). “I hadn’t done any workflows prior to her training, and had very little experience with forms, so I was definitely a newbie when I took the course.”

“She presented a lot of information on good design and coding standards — sprinkling best practices and ‘tricks of the trade’ throughout,” Beckum continues. “Whoever comes behind me to work with Nintex will be able to pick right up where I left off because of the best practices I leveraged for our installation.”

Ryan Cody, an independent consultant who specializes in user experience and user interface design and engineering, concurs. “Nicole kept the sessions interesting and engaging with demonstrations and exercises.”

*“It was the best training I have ever had on
any product — and a huge jump start.”*

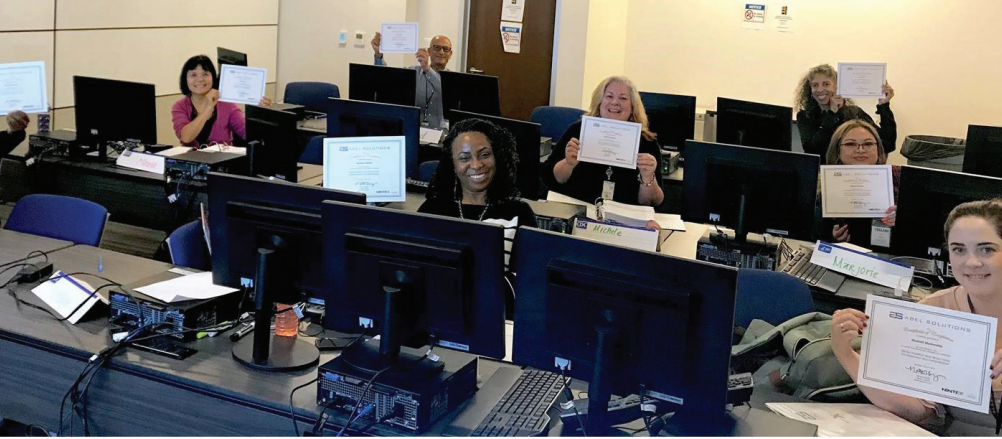

Paige Beckum

AN IMMERSIVE NINTEX EXPERIENCE

Each course includes an overview, expert instruction, intensive training, hands-on activities and a take-home course handbook for both Nintex Workflow and Forms.

- Students are presented with a broad range of topics necessary to become adept at the creation and deployment of Nintex solutions.
- Multiple online exercises are provided at various points throughout the three-day agenda.
- Each student receives a personal login to a SharePoint/ Nintex environment where they create real workflow solutions and practice their newly acquired skills.
- Students’ SharePoint logins stay active for 10 days after the Nintex Training class is over, allowing them to further review their classwork along with the answer key for each exercise.

Aryal Nishant, a SharePoint Analyst with a nationally acclaimed law firm, was a new employee when his manager asked him to take the Abel Solutions Nintex training. Nishant had some training on Nintex before joining the class, but he says the class helped him expand his knowledge significantly. “The class was very detail oriented from beginning to end,” says Nishant.

COMPREHENSIVE LEARNING, DELIVERED

"Before the training, if I had a question or problem, I would go to the Internet and look for solutions," Nishant says. "Now, I have solution knowledge that gives me the confidence to solve the problem on my own."

"I didn't know that I could conditionally start a workflow," he continues. "Since the training, I have used it a lot. It was really beneficial for me."

According to Nishant, the most useful skill he learned was starting a workflow. "I didn't know I could conditionally start a workflow," Nishant says. "Since the training, I have used that a lot. It was really beneficial for me."

He and Beckum agree that the training was exceptionally thorough. "Nintex has a lot of features that I would not have understood or even looked at if I had not taken this class," Beckum notes. "It gave me not only the breadth but also the depth of forms and workflows, broadening my understanding and exploring more design options than I even realized where there."

The training is specifically designed to help students achieve several goals:

- Proficiency in creating basic workflows and forms.
- Understanding to leverage the broad Nintex action set and use it to build real business solutions using Nintex Workflow and Forms.
- Expertise to become more efficient with Nintex Workflow and Forms.

Beyond the expertise they gain during the course, Abel Solutions and Nicole also equip students with ideas for continuous learning. "The very last day, Nicole told us, 'If you have questions, here are the power users on the Internet. Follow their blog and they will help you further,'" says Beckum. "It was great that she introduced us to such a wealth of the resources. The whole experience was fantastic. It was the best training I have ever had on any product — and a huge jump start."

RECOMMEND IT TO OTHERS? OF COURSE!

When asked if they would refer someone to the Vesser's training courses, each of the students we profiled offered an enthusiastic "Yes!" In fact, Nishant has already recommended it. "One of my team members will be taking the training," he says. "I told her it was really helpful."

"Bring your Nintex problems and questions to this training and have them solved and answered!"

Ryan Cody

See Nicole (Prestby) Vesser in Action

Keynote speaker Nicole (Prestby) Vesser, vTE, will present a session at the Nintex ProcessFest Training Conference — based on a client case study — entitled "Implementing Scalable Solutions with Nintex Workflow and Forms." The session will detail how Abel Solutions successfully leveraged Nintex Workflow and Forms to automate critical business processes and make them available in nearly 1,000 SharePoint libraries across hundreds of SharePoint sites. Vesser's presentation is slated for October 2, 2019, from 4 pm – 4:45 pm. She will also be a panelist for a moderated vTE panel entitled "Keys to a Successful Digital Business" October 3, 2019, from 9 – 11 am.

Nicole (Prestby) Vesser

Vesser is a seasoned Nintex veteran who co-leads the Atlanta Nintex User Group. She has nearly a decade of experience leveraging the SharePoint and Nintex platforms to help organizations solve business challenges, promote operational excellence and achieve digital transformation.

About Abel Solutions

For 25 years, Abel Solutions has focused on helping our customers develop and deploy solutions that deliver Business Excellence in terms of profitability, productivity, and competitive leadership. We believe that the most effective solutions are those that leverage and combine a customer's current strengths and assets with new people, process, and technology capabilities to accomplish business goals. Our consultants deliver a portfolio of services including business strategy, collaboration solutions, dashboards and analytics, and managed cloud and IT services.
